

snowboards from the sunny side of Alps

### SCORPION

Faster, stronger, higher! It's never too fast for the Scorpion, because it's simply the best! Our top freeride model for experts. Riders in boardercross competition, several extreme rides from 5.000 m hellyboarding and many enthusiastic national riders prove the quality of Scorpion. Almost as stiff as race boards with a fine side cut line enables dynamic carving at highest speed just as good as deep powder cruising and long terrain jumps. Very recommendable for ex-racers and speed lovers, who prefer fast carving and aggressive riding style.

#### Technical data:

tip to tail vertically laminated light and strong wood core with full around ABS sidewall, F1414 fiberglass under the wood-core, triax faiberglass over the wood core and pure carbon top sheet, hand lacquered. All-around steel edge, 20 stainless steel inserts 4x2, nano-carbon base with die-cut logo

#### Recommended bindings:

Extreme
