

snowboards from the sunny side of Alps

## PRO CARVE

Why do our customers come back after two days just to tell us: "Do you know that you make the best race boards in the whole World? I tried them all but this is crazy!" It's really nice to hear something like that. It drives us to push the limits and never stop.

Our Pro Carve is a hand made racing and carving machine for experts with a long riding history. Developed together with racers, trainers, instructors and extreme freecarvers. Completely hand made out of best materials like carbon and kevlar with a lot of intention for details. Permanently checked in racing and improved. We make something new in the morning, try it out on the hill in the afternoon and discuss it while drinking beer in the evening. Tomorrow we'll do it better again!

Pro Carve is a choice of many national and European cup riders as well as extreme freecarvers all over Europe. Their comments come back to us daily, so we can improve all the time. It's the never ending story...

### Technical data:

tip to tail vertically laminated wood with full around ABS sidewall, heavy f1414 fiberglass under the core, triax with carbon over the wood core and pure carbon top sheet, hand lacquered. All-around steel edge, 20 stainless steel inserts 4x2, nano carbon base with die-cut logo, structure stone grind with hand finished edge tuning, pre-waxed, hand brushed and polished. Ready to race!

### Recommended bindings:

SP Race, SP Race f.a.s.t., Titanal XR

length	eff.edge	radius	width	riders weight
158 cm	143 cm	8.9 m	240/190/239	40-80 kg
163 cm	148 cm	10 m	243/190/241	50-100 kg
170 cm	155 cm	11 m	243/190/241	>50 kg
